**2. Trade restrictions could materially and adversely affect our business, financial condition and results of operations.**

We are engaged in business of integrated logistics services and solution to transport cargo worldwide. Our business may be affected by trade restrictions implemented by countries or territories in which our customers are located or in which our customers' products are manufactured or sold. For example, we are subject to risks relating to changes in trade policies, tariff regulations, embargoes, additional import duties, ban of import/export of certain goods or other trade restrictions which can adversely impact trade volume between countries. Further, there are trade restrictions imposed on sanctioned countries by other countries and international organisations, affecting movement of international cargo. Actions by governments and other authorities and regulators that result in restrictions on movement of cargo or otherwise could also impede our ability to carry out our international freight forwarding operations. In addition, international trade and political issues, tensions and conflicts may cause delays and interruptions to cross-border transportation and result in limitations on our insurance coverage. If we are unable to transport cargo to and from countries with trade restrictions in a timely manner or at all, our business, financial condition and results of operations could be materially and adversely affected.

**3. Our Company has entered into agreements with overseas agents in different countries for handling our logistics operations at the desired locations. Any lapses by such business partners/agents may adversely affect our business and reputation.**

We are an integrated logistics services provider wherein we offer logistics services from the origin of the consignment to the ultimate destination. We currently do not own any overseas branch office. In carrying out such integrated operations, we have entered into agreements with various overseas agents in different countries for handling our logistics operations at the desired locations. We depend on such parties to perform various duties and actions particularly, handling the entire logistics chain of the consignment in their country from the origin to the port or from the port to the destination depending on whether it is an import or export consignment, handling required clearances, supervise and co-ordinate all activities of port and container depot operators, transportation, warehousing, liase with client, etc. Our Company is dependent on such parties for expanding and smooth functioning of our operations. They also help build our brand in international markets and increase our global reach. Any decline in the quality of such parties or termination of their contracts may adversely affect our business operations, particularly considering the fact that for a particular region, we may have tie-ups with a single or few parties. Further we enter into agreements with some of them for a specified period and any non-renewal or early termination of agreement with any party may hamper our operations in that region. We are also exposed to the risk that our overseas agents may be unable to fulfil their contractual obligations to us or will be subject to the risk of fraud or operational errors by their respective employees, and to the risk that their business continuity systems prove to be inadequate. Further, we do not have complete control over the quality of service offered by our agents and they may fail to provide services at the desired level of quality or within the timeline required by us or our clients. We may be held liable as a result for the acts of our agents, including any penalties or liquidated damages that may be imposed by our clients.

If the performance of any overseas agents is not satisfactory, we may need to replace them or take other remedial actions. The loss of some of our key business partners/agents, a significant decrease in business with our larger agents or loss or liability incurred as a result of actions by our overseas agents could adversely affect our business, operations, reputation, financial condition and results of operations.

- 4. *We depend significantly on clients in the marble, granites & tiles industry. A loss of, or a significant decrease in business from clients in the marble, granites & tiles industry could adversely affect our business and profitability.***

We depend significantly on clients operating in the marble, granites & tiles industry in India. Revenues from our clients operating in such industry have been contributing around 70-75% to our total revenue from operations for the nine months period ended December 31, 2017 and in Fiscals 2017, 2016 and 2015. As a result of our dependence on these clients, any loss of business from, or any significant reduction in the volume of business with, any of these clients, if not replaced, could materially and adversely affect our business, financial condition and results of operations. The marble, granites & tiles industry is sensitive to general economic conditions and factors such as consumer demand, inflation, consumer preferences, employment and disposable income levels, interest rate levels, demographic trends, technological changes, government policies, etc. which may negatively affect the demand for our services. Though we have also been catering to other industries such as paper, yarn, agriculture, since our major clients are from marble, granites and tiles industry, any significant reduction in the business operations of such clients or any adverse development in their industry could have a significant negative effect on the demand for our services.

- 5. *An inability to attract, recruit and retain skilled personnel including sufficient number of qualified and experienced drivers may adversely affect our business, results of operations and financial condition.***

Our inland goods transportation business is significantly dependent on our ability to attract, recruit and retain skilled personnel including a sufficient number of qualified and experienced drivers. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. Due to various regulatory requirements that affect availability of goods transportation drivers in India, we face significant competition in attracting, recruiting and retaining qualified and experienced drivers. A shortage of qualified drivers in the transportation industry could force us to either further increase driver compensation, which could reduce our profit margins and which may not be available at commercially viable rates or at all. A shortage of drivers for our operations could affect our ability to meet goods transportation delivery schedules or provide quality services. Therefore, if we are unable to attract and retain a sufficient number of qualified drivers, we could be forced to increase our reliance on hired transportation, decrease the number of pickups and deliveries we are able to make, increase the number of our idle vehicles or limit our growth, any or all of which could have a material adverse effect on our business, results of operations and financial condition.

Further, there is a relatively high rate of attrition in the logistics industry. Higher attrition rates lead to an increase in our training and recruitment costs, which may adversely affect our business and profitability. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers and at wages suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may adversely affect our business, financial condition, results of operations and prospects.

- 6. *Claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured may adversely affect our business, results of operations and financial condition.***

Our logistics business is subject to various risks inherent in the goods transportation industry, including potential liability to our customers which could result from, among other circumstances, damage to property arising from accidents or incidents involving vehicles operated by us. In our goods transportation business, we may be exposed to claims related to cargo loss, theft and damage, property and casualty losses and general liability from our customers. Further we may also face claims from third

parties on account of loss of human or cattle lives, accidental claims, etc. Although we attempt to limit and mitigate our liability for thefts and/or damages arising from negligent acts, errors or omissions through contractual provisions and/or insurance, the indemnities set forth in our contracts and/or our insurance may not be enforceable in all instances or the limitations of liability may not protect us from entire liability for damages. While we maintain insurance coverage at levels and for risks that we believe are customary in the goods transportation industry in India, there can be no assurance that there will not be any claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured. There can also be no assurance that the terms of our insurance policies will be adequate to cover any such damage or loss suffered or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Furthermore, any accident or incident involving our vehicles, even if we are fully insured or held not to be liable, could negatively affect our reputation among customers and the public, thereby making it more difficult for us to compete effectively, and could significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, results of operations and financial condition may be materially and adversely affected.

**7. *We do not verify the contents of the parcels transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.***

We transport various goods as part of our goods transportation business, other than goods that are classified as hazardous or illegal. While we obtain a declaration from the customer regarding the contents of the parcel and its value, we do not independently verify its contents. We also do not have any equipment to enable us to verify all our consignments prior to loading such consignments on our vehicles. Accordingly, we are unable to guarantee that these parcels do not contain any hazardous or illegal goods. In addition, our logistics business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us. Further, we are subject to a broad range of national, State and local environmental, health and safety and criminal laws and regulations. In the course of our operations, we may store, transport or arrange for the storage or transportation of substances defined as hazardous under applicable laws. If any damage or injury occurs as a result of our storage or transportation of hazardous, explosive or illegal materials, we may be subject to claims from third parties, and bear liability, for such damage or injury even if we were unaware of the presence of the hazardous, explosive or illegal materials, and this could have a material adverse effect on our business and financial condition.

**8. *Our Company has not complied with certain statutory provisions under Companies Act. Such non-compliances/lapses may attract penalties.***

Our Company has not complied with certain statutory provisions such as the following:

- Non-compliance with section 203 of Companies Act, 2013. However, our Company has appointed a Company Secretary to look after the legal and secretarial functions of the Company.
- Non-compliance with section 42 of Companies Act, 2013 for non-opening of separate bank account for certain allotments.
- Non-compliance of section 185 of the Companies Act, 2013. However, as on the date of filing of this Draft Red Herring Prospectus, the Company is in compliance with the said section.

Further, our Company has delayed filing of some forms and some forms were incorrectly filed under the Companies Act. No show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Such delay/noncompliance may in the future render us liable to statutory penalties and disallowing the resolutions, which may have consequence of violation of statutory provisions concerned.

**9. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.***

Our business is working capital intensive. A significant portion of our working capital is utilized towards trade receivables. Summary of our working capital position is given below:-

Amount (Rs. In lakhs)

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Issue” beginning on page 91 of this Draft Red Herring Prospectus.

**10. Any anticipated fluctuations in fuel costs may adversely affect our business and profitability. Further we are also susceptible to fluctuations in carrier costs, labour or other inputs.**

As a result of the GoI’s deregulation of fuel prices in India, oil marketing companies are now able to decide on the prices of fuel and have recently announced that fuel prices will be benchmarked to international crude oil prices on a daily basis. The cost of fuel has fluctuated significantly in recent periods due to various factors beyond our control, including international prices of crude oil and petroleum products, global and regional demand and supply conditions, geopolitical uncertainties, import cost of crude oil, government policies and regulations and the availability of alternative fuels. Fluctuations in fuel prices may increase volatility in charges we receive from our business partners. If international crude oil prices increase, we cannot assure you that we will be able to pass on any such increases in the future to our clients, either wholly or in part. Also in addition to fuel costs, there may be other operating charges like carrier costs, labour charges, toll charges which we may not be able to pass on to our customers. If we suffer any long-term increase in costs, our inability to pass on such increases in costs to our clients may adversely affect our operating margins and consequentially, our business and profitability.

**11. Credit rating of our Company.**

The cost and availability of capital, amongst other factors, is also dependent on our credit ratings. We had been last rated by CRISIL financial strength rating at CRISIL MSE 3\*. Ratings reflect a rating agency’s opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, could adversely affect our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

**12. Any disruptions which affect our ability to utilize our transportation network in an uninterrupted manner could result in delays, additional costs or a loss of reputation or profitability.**

With a significant portion of the goods in India being transported by road and sea, our business operations are dependent on the road and sea network in India. Certain factors which could adversely affect such transport modes and result in delays, additional costs or unreliability include bad weather conditions, natural calamities, port maintenance, time-consuming and complex inter-state travel, political unrest, regional disturbances, fatigue or improper conduct of drivers, accidents and third party negligence. We cannot assure you that these factors and conditions will not affect our supply chain and logistics schedules or our ability to operate without disruption. Any such interruptions or disruptions could cause delays in the delivery of our clients' consignments to their destination, or cause damage to the transported goods. Any of these consequences may result in claims for compensation from our clients. Further, such delays or damages may cause a loss of reputation which, over a period of time, could lead to a decline in our business operations. Any prolonged or significant downtime of, or damage to, our business partners' fleet of vehicles or other related equipment operated for us may cause disruptions to our operations. If any of these risks materialize, our business, operations, financial condition and results of operations may be materially and adversely affected.

***13. In addition to own fleet, we use third party transportation service providers and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.***

To carry our inland logistics business, we use our own vehicles as well as hire third party transportation provider services. The availability of third part transportation may be uncertain during periods of high demand. In addition, we do not have any control over the servicing and maintenance of these vehicles. Any non availability of hired trucks, delay in obtaining them and/ or break down, on road repairs or service interruptions may result in loss of orders, delays in delivery of cargo which could lead to customer dissatisfaction and loss of business, which in turn could adversely affect our business, results of operations and financial condition.

***14. We require a number of approvals, NOCs, licences, registrations and permits in the ordinary course of our business. All the approvals are required to be transferred in the name of "ACCURACY SHIPPING LIMITED" from "ACCURACY SHIPPING PRIVATE LIMITED" pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations. The Company has not obtained approvals like Certificate of Registration under Employees State Insurance Act, 1948, registration certificates under relevant shops and establishment act for all the branches, professional tax enrolment certificate, customs registration certificate any failure or delay in obtaining the same in a timely manner may adversely affect our operations. However, the company has obtained group insurance of employees with Bajaj Allianz General Insurance Company Limited and the Company uses certificate of Jayant Logistics Private Limited (Group Company) for Custom Clearances.***

Approvals like Tax Deduction Account Number are currently not traceable by the company. We need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course of our business. Pursuant to our conversion from a private limited company to a public limited company in the year 2018, we need to take necessary steps for transferring the approvals of our company in the new name. In case of delay or failure to obtain the same, it could affect our business operations. Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. We cannot assure you that the approvals, licences, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. We also do not have CHA license in our name as we use license of our Group Company. Additionally, our company has not applied for change of name of the approval/s as mentioned in material licenses/ approvals as mentioned in Government and Other Statutory Approvals Chapter. For more information, see chapter "Government and Other Statutory Approvals" on page 199 of this Draft Red Herring Prospectus.

**15. Our Company has negative cash flows from its operating activities and investing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.**

Our Company had negative cash flows from our operating activities and investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

**(Rs. in Lakhs)**

Particulars	For the period ended December 31, 2017	For The Year Ended				
		2017	2016	2015	2014	2013
Cash Flow from / (used in) Operating Activities	(39.46)	173.31	746.44	580.62	(115.28)	136.88
Cash Flow from / (used in) Investing Activities	(1,859.47)	(417.91)	(1,805.28)	(871.88)	(139.19)	(178.03)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

**16. We are dependent upon few clearing and forwarding agents and transporters. In an eventuality where our suppliers are unable to perform the services in a time-bound manner it may have a material adverse effect on our business operations and profitability.**

For the year ended March 31, 2017 and for the period ended December 31, 2017 our top 5 suppliers contributed around 51.79% and 67.01%, respectively and top 10 suppliers contributed around 61.74% and 79.10%, respectively of our clearing & forwarding and transportation expenses. In the event of a delay, inadequacy or default in performance of our services by any of our vendors, we may not be able to obtain the required services on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of the required services from our clearing & forwarding agents and transporters could adversely affect our business, results of operations and financial condition.

**17. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations and financial condition. The success of our business will depend greatly on our ability to effectively implement our business and growth strategy.**

Our growth strategy requires us to develop and strengthen relationships with existing customers of our logistics operations who may drive high volume orders on an ongoing basis. To remain competitive, we propose to increase our assets base of trucks; we seek to increase our business from existing customers and by adding new customers, explore new industry verticals, well as expanding into new geographical markets.

Our success in implementing our growth strategies may be affected by:

- our ability to maintain client satisfaction and our quality of services;
- develop and maintain relations with our business partners;
- our ability to increase our customer base;
- improve our operations and technology systems
- the general condition of the global economy (particularly of India and the other markets that we currently or may operate in);
- our ability to compete effectively with existing and future competitors,

Many of these factors are beyond our control and there is no assurance that we will succeed in implementing our strategy. Separately, our growth strategy also involves expanding into new geographic markets which will involve additional risk. Our ability to execute our growth strategies will also depend, among other things, on our ability to identify key target segments correctly, diversify and differentiate our service offering and pricing to compete effectively, and scale up and grow our logistics network. We will also need to manage relationships with a greater number of clients, business partners and service providers as we expand. While we have successfully executed our business strategy in the past, there can be no assurance that we will be able to execute our strategy on time. Any of these factors could adversely impact our results of operations. We expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and growth strategy could have a material adverse effect on our business, financial condition and profitability.

***18. We generate a substantial portion of revenue from our domestic operations in certain geographical regions especially Rajasthan, Gujarat and Maharashtra. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.***

We generate a substantial portion of our revenue from domestic operations through our customers situated in Rajasthan, Gujarat and Maharashtra. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in Rajasthan, Gujarat and Maharashtra region to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Rajasthan, Gujarat and Maharashtra market may adversely affect our business prospects, financial conditions and results of operations. However, our Company is already providing its services in other regions such as Tamil Nadu, Karnataka, West Bengal etc. but we are yet to scale our operations in such regions. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

***19. We have not entered into any long term or definitive agreements with our customers. If our customers choose not to utilise our logistics services, our business, financial condition and results of operations may be adversely affected.***

We have not entered into any long term or definitive agreements with our customers, and instead rely on service orders to govern the volume, pricing and other terms of our services. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place, we may be unable to seek compensation for any amount of services performed. Our customers do not, typically, place firm orders until a short time before the services are required from us as a result of which, we do not hold a significant order book at any time, making it difficult for us to forecast revenue. Consequently, there is no commitment on the part of the customer to continue to utilize our services, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences.

Additionally, our customers have high standards for service quality as well as delivery schedules. Any failure to meet our customers' expectations could result in cancellation of orders. There are also a

number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, any of which may have an adverse effect on our business, results of operations and financial condition.

***20. Our Company does not have any long-term contracts with any of shipping lines, transporters, custom clearance etc which may adversely affect our results of operations.***

Our Company neither have any long-term contract with any of shipping lines, transporters, custom clearance agents etc nor any marketing tie up for our services. Any disruption/discontinuance of their services may affect our inability to deliver our services to the clients, which further may adversely affect our business and profitability. However, we have been dealing with shipping lines, transporters, CHAs etc on regular basis.

***21. Any delays or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.***

We regularly commit resources to assignments prior to receiving advances or other payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if an order/assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations

***22. If we are not able to sell container space that we purchase from sea shipping lines, capacity that we charter from our air carriers and utilize our truck capacity, we will not be able to recover our costs and our profitability may suffer.***

We also operate freight forwarding business. As a less than container load (“LCL”) consolidator, we contract with shipping lines to obtain transportation for a fixed number of containers between various points during a specified time period at variable rates. As an air freight forwarder, we also charter aircraft capacity to meet peak season volume increases for our clients. We then solicit freight from our clients to fill the containers and air charter capacity. When we contract with shipping lines and air carriers, we become obligated to pay for the container space or charter aircraft capacity that we purchase. If we are not able to sell all of our purchased container space or charter aircraft capacity, we will not be able to recover our costs for such purchase of container space or charter aircraft capacity and our business, financial condition and results of operations could be adversely affected.

***23. Our Company may not be able to deliver the cargo on timely basis due to which we could become liable to claims by customers, suffer adverse publicity and incur substantial cost as result of deficiency in our service which could adversely affect our results of operations.***

Except for our fleet of trucks, we often do not own or control the transportation assets that deliver our customers cargo and we often do not employ people directly involved in delivering the cargo. We are dependent on independent third parties to provide logistic services this could cause delay in reporting certain events, including recognizing revenue and claims. Any failure or defect in services by such third parties, could result in dissatisfaction of the customers and may affect our brand image.

***24. Currently all our branch offices are taken on leasehold basis.***

As on the date of the DRHP, we have five branch offices situated, two branch offices at Gujarat and one branch office each at Mumbai, Kolkata and Chennai. All such branch offices are taken on lease basis from third parties. For further detail, kindly refer to the chapter titled, “Our Business” beginning on page 119 of this Draft Red Herring Prospectus. If we do not comply with certain conditions of the lease/rent agreement, the lessor may terminate the lease, which could have an adverse effect on our operations and there can be no assurance that renewal of lease agreement with the owner will be entered into. In the event of non-renewal of lease, we may be required to shift our branch facilities to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one.

**25. Any interruption of operations at our vehicle maintenance facility may adversely affect our business and results of operations.**

Our Gandhidham facility includes a vehicle maintenance facility/ workshop in addition to serving as a centralised hub for our operations. The operation at this facility is subject to compliance with the applicable regulatory requirements, and further subject to operating risks such as the breakdown or failure of equipment, power supply or processes, natural disasters and accidents. Any interruption of our operations at our Gandhidham facility could significantly reduce our ability to perform maintenance related activities for our vehicles and manage and carry out our business operations. If prolonged, such interruption could impact our ability to service our clients and our business, financial condition and results of operations may be materially and adversely affected.

**26. We have not received complete information with respect to persons forming part of our Promoter Group.**

Our Company has issued letters dated February 23, 2018 to relatives of our Promoters, Vinay Tripathi and Rama Tripathi asking for details of entity(ies) in which they severally or jointly may have an interest. Our Company has sent a letter to each relative demanding their personal documents for identification of promoter group. However, we have not received reply from Dinanath Tripathi, Dhanwanti Tripathi, Ganesh Tripathi, Kailash Tripathi, Suresh Tripathi, Savitri Dubey, Malti Tiwari, Tara Rajkumar Shukla, Hema Rajesh Mishra, immediate relatives of our Promoters. Therefore, the disclosures made in this Draft Red Herring Prospectus are limited to the extent of information that has been made available by our Promoters in relation to Promoter Group and Group Companies. For further details, please refer to chapter titled “Our Promoter and Promoter Group” beginning on page 163 of this Draft Red Herring Prospectus.

**27. Some of our Group Companies have negative net worth and have incurred losses in the previous financial years.**

**28. Conflicts of interest may arise out of common business undertaken by our Company, Promoter and our Group Companies.**

Some of our members of promoter group and group companies are also authorized to carry similar activities as those conducted by our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, members of our Promoter Group and our Group Company in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other company in which our Promoter has interests. There can be no assurance that our Promoter or our Group Company or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

***29. Failure or disruption of our IT and/or business resource planning systems may adversely affect our business, financial condition, results of operations, cash flows and prospects. Further changes in technology may render our current technologies obsolete or require us to make substantial capital investments***

We have implemented or are in process of implementation of some information technology (“IT”) and/or business resource planning systems to cover key areas of our operations. We are dependent on technology in relation to customer order management and dispatches, financial accounting and shipments. We rely on our IT infrastructure to provide us with connectivity and data backup across our locations and functions. Our operations are vulnerable to interruption by events beyond our control such as fire, earthquake, power loss, telecommunications or internet failures, terrorist attacks and computer viruses. Any breaches of our IT systems may require us to incur further expenditure on repairs or more advanced security systems. A significant system failure could adversely affect our ability to manage overall operations, thereby affecting our ability to deliver our services to our clients, affecting our reputation and revenues.

With the ongoing technological revolution and emerging e-commerce mode of business operations, we expect our clients to demand sophisticated and customized solutions. We may lose clients and our business could be affected if we fail to implement and maintain our technology systems or fail to upgrade or replace our technology systems to handle increased volumes, meet the demands of our clients and protect against disruptions of our operations. Some of our existing technologies and processes in the business may become obsolete or perform less efficiently compared to newer and better technologies and processes in the future. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations. Certain of our competitors may have access to similar or superior technology or may have better adapted themselves to technological changes. The logistics industry could also experience unexpected disruptions from technology based start-ups. The cost of upgrading or implementing new technologies could be significant and could adversely affect our business, operations, financial condition and results of operations.

***30. We have in the past entered into related party transactions and may continue to do so in the future.***

Our Company has entered into various transactions with our Promoters, Promoter Group, Directors and their relatives. While we believe that all such transactions are conducted on arms length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “Related Party Transactions” beginning on page 171 of the Draft Red Herring Prospectus.

***31. Our insurance coverage may not be adequate.***

We have insured our rigs and equipments including all movement of goods through marine policy. We have taken insurance policies to insure our assets against fire, burglary, break down of appliance and public liability. We also have vehicle insurance policies to insure our vehicles. We have also taken Group Personal Accident policy for our employees. While we believe that we maintain insurance

coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like housebreaking, terrorism, etc. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

For further details, please refer chapter titled “Our Business” beginning on page 119 of this Draft Red Herring Prospectus.

**32. *We are susceptible to risks relating to fluctuations in currency exchange rates.***

We also provide international freight forwarding services and derive a portion of our revenue from international operations. Any fluctuation in the value of the Indian Rupee against any other foreign currency will affect our results of operations. In the nine month period ended December 31, 2017 and in Fiscals 2017, 2016 and 2015, gains and losses on account of currency exchange rates were ₹50.09 lakhs, ₹39.87 lakhs, ₹19.30 lakhs and ₹8.54 lakhs, respectively, and constituted 0.19%, 0.20%, 0.11% and 0.05% of our total revenue from operations, respectively. Further, we currently do not use any foreign exchange hedging contracts to manage our exchange rate risk. Although we may, in the future, enter into such foreign exchange hedging contracts, we cannot assure you that such hedges will be available or commercially viable or effective to hedge our exposure to foreign currency risks. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may adversely affect our reported revenues and financial results. We cannot guarantee that we will not experience foreign exchange losses going forward and that such losses will not adversely affect our business, financial condition or results of operations.

**33. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.***

The market for our services is competitive on account of both the organized and unorganized players. Many segments within the logistics industry are highly commoditized and have low barriers to entry or exit, leading to a market with a very high degree of fragmentation. Increased competition from other organized and unorganized third party logistics or people transport providers (including our business partners) may lead to a reduction in our revenues, reduced profit margins or a loss of market share. Our success depends on our ability to anticipate, understand and address the preferences of our existing and prospective clients as well as to understand evolving industry trends and our failure to adequately do so could adversely affect our business. Further, if our level of service deteriorates, or if we are unable to provide our services in a timely, reliable, safe and secure manner, our reputation and business may suffer. Our competitors may successfully attract our clients by matching or exceeding what we offer.

Among other things, our competitors may:

- expand their transportation network or increase the frequency in their existing routes;
- reduce their cost of services;
- benefit from greater economies of scale if they are larger than us and operating efficiencies such as a broader logistics network, a wider range of services, larger brand recognition or greater financial resources than we do, and may be able to devote greater resources to pricing and promotional programs.

In areas of business or verticals where we are a new entrant, we may be unable to compete effectively with our competitors, some of whom may have more experience. Our inability to compete effectively could affect our ability to retain our existing clients or attract new clients which may in turn materially and adversely affect our business, financial condition, results of operations, cash flows and prospects.

**34. *We are dependent on our customers’ business performance and developments in their markets and industries and their continuing outsourcing of logistics operations***

As a logistics services and solutions provider, we are primarily engaged in providing services to customers in a wide variety of industries to serve their logistics and supply chain needs. We are therefore

dependent on our customers' business performance and developments in their markets and industries. If our customers' business in a geographic market served by us is on decline, such decline will likely lead to a corresponding decrease in demand for our integrated logistics and international freight forwarding services. In addition, since we serve as a third party logistics provider for our customers, adverse changes in their outsourcing decisions could materially and adversely affect our business, financial condition and results of operations. If our customers change their supply chain strategy and decide to reduce their outsourcing of logistics operations or if they decide to outsource their requirements to other competitors, it will have a direct negative impact on our integrated logistics business. Adverse developments in our customers' business performance and outsourcing decisions could therefore materially and adversely affect our business, financial condition and results of operations.

***35. Our application for registration of our corporate logo under The Trademarks Act, 1999 are still pending with relevant trademark authorities as a result of which we may have lesser recourse to initiate legal proceedings to protect our brand. This may lead to dilution in our brand value.***

We operate in an extremely competitive environment, where generating brand recognition is significant element of our business strategy. However our trademark application for our corporate logo is pending with relevant certifying authority and therefore we do not enjoy the statutory protection accorded to a registered trademark and are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party. As a result, our ability to use our trademark may be impaired. For further details please refer to section titled "Government and Other Approvals" beginning on page 199 of this Draft Red Herring Prospectus. There can be no assurance that we will be able to register the logo or our other trademarks or third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill.

***36. Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.***

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

***37. Our lenders have charge over our movable and immovable properties in respect of finance availed by us.***

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 4,255.74 lakhs as on December 31, 2017. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adversely affect on business, financial condition or results of operations. For further information on the *Financial Indebtedness* please refer to page 189 of this Draft Red Herring Prospectus. However, our Company proposes to repay Rs 750.00 lakhs of the above loans from the Net proceeds of the Issue, for further details please refer chapter titled, "Objects of the Issue" beginning on page 91 of this Draft Red Herring Prospectus.

***38. Our lenders have imposed certain restrictive conditions on us under our financing arrangements.***

Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has

important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled “*Financial Indebtedness*” on page 189 of the Draft Red Herring Prospectus. Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance

**39. *We have taken guarantees from Promoters in relation to debt facilities provided to us.***

We have taken guarantees from Promoters in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information please see the chapter titled “*Financial Indebtedness*” beginning on page 189 of this Draft Red Herring Prospectus.

**40. *Our Company has unsecured loans which are repayable on demand. Any demand loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.***

As on December 31, 2017, our Company has unsecured loans amounting to Rs. 82.57 lakhs from related and other parties that are repayable on demand to the relevant lender. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, please refer the chapter titled Financial Statements as Restated beginning on page 173 of this Draft Red Herring Prospectus.

**41. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 91 of this Draft Red Herring Prospectus.

**42. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 172 of this Draft Red Herring Prospectus.

- 43. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 91 of this Draft Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

We intend to use entire Issue Proceeds towards meeting the purchase of goods transportation vehicle, repayment of secured loan, working capital requirement, general corporate purpose and to meet the issue expenses. We intend to deploy the Net Issue Proceeds in financial year 2018-19 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 91 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘Objects of the Issue’ beginning on page 91 of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

- 44. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

Since the Issue size is less than Rs.10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 45. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 46. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.***

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

***47. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding, unsecured loan given by them or by entities in which they are interested and dividend entitlement in our Company. For further information, see “Capital Structure” and “Our Management” on pages 75 and 149, respectively, of this Draft Red Herring Prospectus.

***48. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of the Issue, our Promoters and Promoter Group will collectively own [●]% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

***49. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

***50. Industry information included in this Draft Red Herring Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

**51. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the floor price.***

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Floor Price of the Price Band as may be decided by the Company in consultation with the BRLM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the section titled “Risk Factors – Prominent Notes” on page 20 of this Draft Red Herring Prospectus.

**52. *We have issued Equity Shares in the last twelve months, the price of which may be lower than the Issue Price.***

Our Company has issued 41,20,000 Equity Shares at a price of Rs 10/- per equity share in the last twelve months. For further details of Equity Shares issued, please refer to chapter titled, ‘Capital Structure’ beginning on page 75 of this Draft Red Herring Prospectus.

• **Issue Specific Risks**

**53. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue Price of our Equity Shares will be determined by book built method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 100 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

**54. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options granted pursuant to the ESOP Schemes may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. Except as disclosed in “Capital Structure” on page 75, we cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

**55. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the

relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

**56. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

## **EXTERNAL RISK FACTORS**

**57. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017 that combines multiple taxes and levies by the Central and State Governments into a unified tax structure. While the Government of India and certain state governments have announced that all committed incentives will be protected following the implementation of the GST, given that the various rules and regulations regarding the new regime are being evaluated in terms of various implications concerning the GST, we cannot provide you with any assurance as to this or any other aspect of the tax regime following implementation of the GST including antiprofitereering regulations of the new tax regime and availability of input tax credit.

Further, the Union Budget presented in the Indian Parliament on February 1, 2018, proposed a number of amendments to the existing direct and indirect tax regime which includes the withdrawal of long term capital gains exemptions on equity shares, long term capital gains applicability in the hands of Foreign Institutional Investors and applicability of dividend distribution tax for certain transactions with shareholders, among others. The Union Budget is required to be approved by both houses of the Indian Parliament followed by Presidential Assent in order for the Income Tax Act, 1961 and other statutes to be amended and for the above proposals to have the effect of law. Prospective investors should consult their own tax advisors in relation to the consequences of investing in the Equity Shares.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in

the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

**58. *Investors may not be able to enforce a judgment of a foreign court against our Company.***

Our Company is incorporated under the laws of India. Our Company's assets are primarily located in India and all our Directors and Key Managerial Personnel are residents of India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce against them judgments obtained in courts outside India. Moreover, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with Indian public policy.

**59. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax ("STT") is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares, except in the case of such acquisitions where STT could not have been paid, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, Finance Bill, 2018, proposes to tax such long term capital gains exceeding ₹ 100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

**60. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.***

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under chapter "Financial Statements as restated" beginning on page 173 the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

**61. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties;
- Goods and service tax and other levies; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our services and therefore demand for our services. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

**62. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

**63. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**64. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**65. *Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the

securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

***66. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and Shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction/

***67. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

***68. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

***69. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.***

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

***70. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

## **GLOBAL ECONOMIC OVERVIEW**

According to the International Monetary Fund (IMF), the global economy is experiencing a near-synchronous recovery, the most broad-based since 2010. In 2017, roughly three-quarters of countries experienced improvements in their growth rates, the highest share since 2010. The latest World Economic Outlook (WEO) of the IMF shows global GDP growth accelerated to around 3.6 percent in 2017 from 3.2 percent in 2016, and the forecast for 2018 has been upgraded by 0.2 percentage points to 3.9 percent. Although rebounding, global growth is still well below levels reached in the 2000s.

One reason why the recovery has spread around the globe is that world trade in goods and services has finally emerged from its torpor, registering 4.7 percent real volume growth in 2017 compared with 2.5 percent in 2016. Another reason is that commodity producers such as Russia, Brazil, and Saudi Arabia, which for the past few years been suffering from depressed prices, have benefitted from the upswing in demand. Commodity prices increased smartly in 2017, led by petroleum, whose price rose by 16 percent to reach \$61 per barrel by the end of the year.

Even as global growth and commodity prices have surged, inflation has remained remarkably quiescent, remaining below 2 percent in the main advanced regions. Consequently, monetary policies in the US, Eurozone and Japan have remained highly accommodative despite a strong recovery. These unusual settings—rapid growth, ultra-low interest rates—at a late stage in the economic cycle have produced the rarest of combinations: record-high high bond prices and stock market valuations, both at the same time. The consensus forecast calls for these conditions to be sustained in 2018, as companies respond to buoyant demand conditions by stepping up investment, some governments (such as the US) embark on expansionary fiscal policies, while advanced country monetary policies remain simulative and world trade continues to grow briskly.

What are the risks? Of course, there are the usual geo-political and geo-economic risks: war in the Korean peninsula; political upheaval in the Middle East; aggressive output cuts by Saudi Arabia (and Russia) in advance of the planned listing of the Saudi Arabian oil company, Aramco, which could force oil prices even higher; a final reckoning from China's unprecedented credit surge in the form of capital controls, slowdown in growth, and a sharply depreciating currency with consequences for the global economy (Economic Survey, 2016-17, Chapter 1); and trade tensions that could lead to skirmishes, and then spiral out of control. But perhaps the main risks lie on the macro-finance front in advanced economies. These stem from three, inter-related, sources:

- Asset valuations (price-equity ratios) tend to revert to their mean. And the faster and higher they climb, especially so late in the economic cycle, the greater the risk of sharp corrections.
- Simultaneously high valuations of both bonds and equities tend to be briefly lived because they suffer from an acute tension: if future earnings and economic growth are so bright, justifying high equity prices, interest rates cannot be forever so low.
- And if interest rates rise—or if markets even sense that central banks will need to shift their stance—both bond and equity prices could correct sharply. A plausible scenario would be the following. The IMF is now forecasting that advanced country output gaps will close in 2018 for the first time since the Global Financial Crisis. As this occurs, wages would start rising, eating into profits (which would

prick equity valuations); and as inflation rises in tandem, policy makers would be forced into raising rates, deflating bond valuations and further undermining share prices.

What would happen to growth if asset prices correct? Surely, the impact would be far smaller than it was in 2007-09, because advanced countries are far less vulnerable than they were a decade ago. In particular, the leverage tied to these assets is much lower, which would minimize contagious propagation; while banks are much better buffered, with higher levels of capital and core deposits, and lower levels of risky assets.

Even so, there would be some consequences. For one, a large decline in wealth would force advanced country consumers to cut back on their spending, which in turn would lead firms to curtail their investments. And if this happens, monetary and fiscal policies would have much less room for expansionary manoeuvre since interest rates are already low while government debts are high. And the political implications of yet another decline in asset prices, the second in a decade, could also be significant, with effects that are difficult to imagine.

In sum, assessing future risks hinges on two calls: interest rate policy and asset valuations. On policy, extraordinarily low rates have, to paraphrase Paul Krugman, become “an obsession in search of a justification.” Initially justified by the dislocations caused by the Global Financial Crisis, then by large output gaps, they are now defended on the grounds that inflation remains weak, even as the slack in product and labor markets is disappearing rapidly. Will the gathering new evidence on closing output gaps and rising employment dispel that obsession?

On valuations, the prognosticator must navigate a narrow strait: steering clear of the “Cry of Wolf” trap (bond prices will finally, finally correct, having defied the prediction of correction in each of the last several years), without succumbing to the siren call of “This Time is Different” (stock valuations are sustainable this time because interest rates will remain at historic lows).

## OVERVIEW OF INDIA’S ECONOMIC PERFORMANCE IN 2017-18

### Economic activity

The key question going forward is whether the economy has troughed, and if so at what pace it will recover toward its medium term trend. High frequency indicators do suggest that a robust recovery is taking hold as reflected in a variety of indicators, including overall GVA, manufacturing GVA, the IIP, gross capital formation (Figure 17) and exports.

Similarly, real non-food credit growth has rebounded to 4 percent in November 2017 on a year-on-year basis, while the squeeze on real credit to industry is abating (Figure 18). Moreover, the flow of nonbank resources to the corporate sector, such as bond market borrowing and lending by NBFCs, has increased by 43 percent (April-December 2017 compared to the same period a year ago), substituting in part for weak bank credit. Rural demand, proxied by motor cycle sales, and auto sales, while not yet back to its pre-demonetization trend, are recovering (Figures 19 and 20).

Perhaps most significantly, the behaviour of manufacturing exports and imports in the second and third quarters of this fiscal year has started to reverse. The re-acceleration of export growth to 13.6 percent in the third quarter of FY2018 and deceleration of import growth to 13.1 percent, in line with global trends, suggest that the demonetization and GST effects are receding. Services export and private remittances are also rebounding (Figure 21).

On demonetization specifically, the cash-to-GDP ratio has stabilized, suggesting a return to equilibrium. The evidence is that since about June 2017 the trend in currency is identical to that pre-demonetization (Figure 22). The stabilization also permits estimation of the impact of demonetization: about Rs. 2.8 lakh Crores less cash (1.8 percent of GDP) and about Rs. 3.8 lakh Crores less high denomination notes (2.5 percent of GDP).

A final, important factor explaining the growth recovery is fiscal, which is providing a boost to aggregate demand. For reasons related to smoothening the transition, GST revenues will only be collected for 11 months, which is akin to a tax cut for consumers. Meanwhile, overall revenue expenditure growth by the central and state governments at remains strong at 11.7 percent (April to November). Cyclical conditions may also lead to lower tax and non-tax revenues, which act as an automatic stabilizer.

All this said, while the direction of the indicators is positive, their level remains below potential. IIP growth (April-November 2017 over same period in the previous year) is 3.2 percent, real credit growth to industry is still in negative territory, and the growth in world trade remains less than half its level of a decade ago. Moreover, even though the cost of equity has fallen to low levels, corporates have not raised commensurate amounts of capital, suggesting that their investment plans remain modest (Box 6). In other words, the twin engines that propelled the economy's take-off in the mid-2000s – exports and investment – are continuing to run below take-off speed.

Meanwhile, developments in the agriculture sector bear monitoring. The trend acceleration in rural wages (agriculture and non-agriculture), which had occurred through much of 2016 because of increased activity on the back of a strong monsoon, seems to have decelerated beginning just before the kharif season of 2017-18 (Figure 23) but it is still greater than much of the last three years. Three crop-specific developments are evident. Sowing has been lower in both kharif and rabi, reducing the demand for labour. The acreage for kharif and rabi for 2017-18 is estimated to have declined by 6.1 percent and 0.5 percent, respectively. Pulses and oilseeds have seen an increase in sowing, but this has translated into unusually low farm gate prices (below their minimum support price, MSP), again affecting farm revenues. The so-called TOP perishables (tomatoes, onions, and potatoes) have meanwhile fluctuated between high and low prices, engendering income uncertainty for farmers.

The CSO has forecast real GDP growth for 2017-18 at 6.5 percent. However, this estimate has not fully factored in the latest developments in the third quarter, especially the greater-than-CSO-forecast exports

and government contributions to demand. Accordingly, real GDP growth for 2017-18 as a whole is expected to be close to 6 3/4 percent. Given real GDP growth of 6 percent in the first half, this implies that growth in the second half would rebound to 7.5 percent, aided by favourable base effects, especially in the fourth quarter.

Average CPI inflation for the first nine months has averaged 3.2 percent and is projected to reach 3.7 percent for the year as a whole. This implies average CPI inflation in the last quarter of 5 percent, in line with the RBI's forecast. Therefore, the GDP deflator is expected to grow by 3.6 percent for 2017-18, somewhat higher than the CSO's forecast of 2.8 percent. Consequentially, nominal GDP growth is estimated at 10.5 percent, compared with the CSO's 9.5 percent estimate.

### **Macroeconomic indicators**

After 13 months of continuously under-shooting the inflation target by an average of 130 basis points, headline inflation for the first time crossed the RBI's 4 percent target in November, posting a rate of 5.2 percent in December 2017 (Figure 24). The recent upswing in inflation stems from rising global oil prices (not all of which has been passed on to consumers), unseasonal increases in the prices of fruits and vegetables, and the 7th Pay Commission housing rent allowances, which mechanically increase inflation. Stripped of all these factors, underlying inflation has been increasing at a more modest pace, reaching 4.3 percent at end-December—in part because firms are passing the incidence of GST on to final consumers only gradually.

The current account deficit has also widened in 2017-18 and is expected to average about 1.5-2 percent of GDP for the year as a whole. The current account deficit can be split into a manufacturing trade deficit, an oil and gold deficit, a services deficit, and a remittances deficit (Figure 25). In the first half of 2017-18, the oil and gold balance has improved (smaller deficit of \$47 billion) but this has been offset by a higher trade deficit (\$18 billion) and a reduced services surplus (\$37 billion), the latter two reflecting a deterioration in the economy's competitiveness.

Despite these developments, the overall external position remains solid. The current account deficit is well below the 3 percent of GDP threshold beyond which vulnerability emerges. Meanwhile, foreign exchange reserves have reached a record level of about \$432 billion (spot and forward) at end-December 2017, well above prudent norms.

### **OUTLOOK FOR 2018-19**

The outlook for 2018-19 will be determined by economic policy in the run-up to the next national election. If macro-economic stability is kept under control, the ongoing reforms are stabilized, and the world economy remains buoyant as today, growth could start recovering towards its medium term economic potential of at least 8 percent.

Consider the components of demand that will influence the growth outlook. The acceleration of global growth should in principle provide a solid boost to export demand. Certainly, it has done so in the past, particularly in the mid-2000s when the booming global economy allowed India to increase its exports by more than 26 percent per annum. This time, the export response to world growth has been in line with the long-term average, but below the response in the mid-2000s. Perhaps it is only a matter of time until exports start to grow at a healthy rate. Remittances are already perking up, and may revive further due to higher oil prices.

Private investment seems poised to rebound, as many of the factors exerting a drag on growth over the past year finally ease off. Translating this potential into an actual investment rebound will depend on the resolution and recapitalization process. If this process moves ahead expeditiously, stressed firms will be put in the hands of stronger ownership, allowing them to resume spending. But if resolution is delayed, so too will the return of the private capex cycle. And if this occurs public investment will not be able to step into the breach, since it will be constrained by the need to maintain a modicum of fiscal consolidation to head off market anxieties.

Consumption demand, meanwhile, will encounter different tugs. On the positive side, it will be helped by the likely reduction in real interest rates in 2018-19 compared to the 2017-18 average. At the same time, average oil prices are forecast by the IMF to be about 12 percent higher in 2018-19, which will crimp real incomes and spending—assuming the increase is passed on into higher prices, rather than absorbed by the budget through excise tax reductions or by the oil marketing companies. And if higher oil prices requires tighter monetary policy to meet the inflation target, real interest rates could exert a drag on consumption.

Putting all these factors together, a pick-up in growth to between 7 and 7.5 percent in 2018-19 can be forecasted, re-instating India as the world's fastest growing major economy. This forecast is subject to upside potential and downside risks. The biggest source of upside potential will be exports. If the relationship between India's exports and world growth returns to that in the boom phase, and if world growth in 2018 is as projected by the IMF, then that could add another ½ percentage point to growth.

Another key determinant of growth will be the implementation of the IBC process. Here timeliness in resolution and acceptance of the IBC solutions must be a priority to kick-start private investment. The greater the delays in the early cases, the greater the risk that uncertainty will soon shroud the entire IBC process. It is also possible that expeditious resolution may require the government to provide more resources to PSBs, especially if the haircuts required are greater than previously expected, the ongoing process of asset quality recognition uncovers more stressed assets, and if new accounting standards are implemented.

Persistently high oil prices (at current levels) remain a key risk. They would affect inflation, the current account, the fiscal position and growth, and force macroeconomic policies to be tighter than otherwise. One eventuality to guard against is a classic emerging market “sudden stall” induced by sharp corrections to elevated stock prices. (Box 9 suggests that India's stock price surge is different from that in other countries but does not warrant sanguine-ness about its sustainability.) Savers, already smarting from reduced opportunities in the wake of demonetization, from depressed gold prices, and from lower nominal interest rates, would feel aggrieved, leading to calls for action. Stock price corrections could also trigger capital outflows, especially if monetary policy unwinds less hesitantly in advanced countries and if oil prices remain high. Policy might then have to respond with higher interest rates, which could choke off the nascent recovery. The classic emerging market dilemma of reconciling the trade-off between macro-stability and growth could then play itself out.

A key policy question will be the fiscal path for the coming year. Given the imperative of establishing credibility after this year, given the improved outlook for growth (and hence narrowing of the output gap), and given the resurgence of price pressures, fiscal policy should ideally have targeted a reasonable fiscal consolidation. However, setting overly ambitious targets for consolidation—especially in a pre-election year—based on optimistic forecasts that carry a high risk of not being realized will not garner credibility either. Pragmatically steering between these extremes would suggest the following: a modest consolidation that credibly signals a return to the path of gradual but steady fiscal deficit reductions.

Against this overall economic and political background, economic management will be challenging in the coming year. If the obvious pitfalls (such as fiscal expansion) are avoided and the looming risks are averted that would be no mean achievement.

## **SERVICE INDUSTRY: INDIAN OVERVIEW**

### **Introduction**

The services sector is not only the dominant sector in India's GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. ## **LOGISTICS SERVICE INDUSTRY: GLOBAL OVERVIEW**

Logistics is an integral activity for economic growth as it involves the management of flow of goods from place of origination to place of consumption. The sector comprises shipping, port-services, warehousing, rail, road and air freight, express cargo and other value added services. The global logistics market currently generates over USD 8 trillion annually and represents around 11% of global GDP. The growth of the logistics sector is linked to growth in international trade flows and the robustness of the economic environment.

Trade was severely affected during the financial crisis of 2008-2009. Since then, global trade had been recovering and has returned back to 2009 levels in recent years, i.e. around 60% of global GDP.

The following key trends are being observed in the logistics sector across the globe:

### **1. Digitization and Automation**

Digitization in the logistics sector is currently in a nascent stage with most processes yet to be automated. The current structure of the logistics sector involves intermediaries, which lead to leakages in the value chain and hence, higher costs for consumers. Technology is being applied and implemented in different formats; physical automation for trucking and warehousing; automated documentation and booking of parcels, online marketplaces for comparing price and services, etc. All these technological enhancements have provided benefits in the form of disintermediation of services, cost rationalization and curbing inefficiencies.

### **2. Shifting of Trade Centres**

Demographic profiles of Asian populations coupled with economic growth has triggered demand-led consumption. In Africa, critical positioning and access to natural resources is incentivizing investments in the region. Population density and ever-increasing aspirational requirements are leading large scale producers to migrate to these regions to build infrastructure and production facilities. Accordingly, trade movement has been increasing towards these regions to meet the growing demand and investments.

### **3. E-Commerce Wave**

The growth of e-commerce has given way to specific logistics channels handling only last mile deliveries. These channels ensure faster delivery and provide assured reverse logistics. They also insure for the consignee collection of payment. This model is a true 3PL (third-party logistics) service offering. With the complexity involved and the level of automation required, big e-commerce companies like Amazon and others have set up their own last mile delivery services and are now entering as full-fledged 4PL logistics service providers.

## **LOGISTICS SERVICE INDUSTRY: INDIAN OVERVIEW**

India's logistical costs as a percentage of GDP is on the higher side: 13.0% vs. global average of 11.7%. Logistics in India are plagued by an inefficient system, lagging infrastructure, lower average trucking speeds, congestion and bottlenecks in surface transportation, etc. In terms of the relative composition of transportation and logistics costs, transportation costs in the US and China are high due to widespread geography. Interestingly, costs are also high in India but due to a combination of factors including vehicle quality, stressed drivers, overloading, poor road infrastructure, and low average speeds. In addition, costs are higher due to excessive taxes and toll expenditures.

The size of the logistics sector in India is estimated to be USD 260 billion. Unlike global trends, the logistics sector in India has been growing at a healthy rate of ~14% over the last 5 years on strong demand drivers. Over the last two decades, the Indian logistics sector has evolved from mere transportation services to fully integrated service providers. Going forward, the trend towards integration of logistics service providers is expected to continue and new players/business models are expected to emerge amid the digitization and automation of business processes, implementation of the new GST (goods and services tax), and expansion in the 3PL/4PL service landscape.

### **Evolution of Logistics Sector in India**

#### **Before 1990s**

- Limited to outsourcing of transportation activities for movement of goods through warehouses
- Mainly annual contracts
- Due to complex excise tax and other duties the focus was on cargo movement for reducing inventory and distribution costs through physical distribution management

#### **1990s to 2000**

- With port modernization, discharge & loading operations at port became efficient
- Custom clearance, freight forwarding, and inventory management became more structured, restricted operations in periphery of port
- Focus on integration of business functions to manage supply chain, mostly multimodal including open yard management

#### **2000 to 2014**

- Growth in trade volumes & regulations has led to emergence of CFS/ICD operations
- Third-party logistics service providers needed to handle movement of cargo across the logistics value chain
- Higher outsourcing and more value added services came into play like in-plant management, reverse logistics etc.
- Focus on integrating supply chain, service providers to meet customers distribution needs

#### **After 2014**

- Digitization of logistics services to increase transparency resulting in disintermediation of services.
- Market demanded total integration of logistics services and outsourcing to 3PL/4PL service providers
- Efficiency and cost Rationalization through adaptation and automation of technology on back of easing regulations

Thus, Third Party Logistics Services Industry should be analysed in the light of Logistics Services Industry at large. An appropriate view on Third Party Logistics Industry, then, calls for the overall economy outlook, performance and expectations of Service Sector, position and outlook of Logistics Services Industry segment and micro analysis thereof.

## **GLOBAL ECONOMIC OVERVIEW**

According to the International Monetary Fund (IMF), the global economy is experiencing a near-synchronous recovery, the most broad-based since 2010. In 2017, roughly three-quarters of countries experienced improvements in their growth rates, the highest share since 2010. The latest World Economic Outlook (WEO) of the IMF shows global GDP growth accelerated to around 3.6 percent in 2017 from 3.2 percent in 2016, and the forecast for 2018 has been upgraded by 0.2 percentage points to 3.9 percent. Although rebounding, global growth is still well below levels reached in the 2000s.

One reason why the recovery has spread around the globe is that world trade in goods and services has finally emerged from its torpor, registering 4.7 percent real volume growth in 2017 compared with 2.5 percent in 2016. Another reason is that commodity producers such as Russia, Brazil, and Saudi Arabia, which for the past few years been suffering from depressed prices, have benefitted from the upswing in demand. Commodity prices increased smartly in 2017, led by petroleum, whose price rose by 16 percent to reach \$61 per barrel by the end of the year.

Even as global growth and commodity prices have surged, inflation has remained remarkably quiescent, remaining below 2 percent in the main advanced regions. Consequently, monetary policies in the US, Eurozone and Japan have remained highly accommodative despite a strong recovery. These unusual settings—rapid growth, ultra-low interest rates—at a late stage in the economic cycle have produced the rarest of combinations: record-high high bond prices and stock market valuations, both at the same time. The consensus forecast calls for these conditions to be sustained in 2018, as companies respond to buoyant demand conditions by stepping up investment, some governments (such as the US) embark on expansionary fiscal policies, while advanced country monetary policies remain simulative and world trade continues to grow briskly.

What are the risks? Of course, there are the usual geo-political and geo-economic risks: war in the Korean peninsula; political upheaval in the Middle East; aggressive output cuts by Saudi Arabia (and Russia) in advance of the planned listing of the Saudi Arabian oil company, Aramco, which could force oil prices even higher; a final reckoning from China's unprecedented credit surge in the form of capital controls, slowdown in growth, and a sharply depreciating currency with consequences for the global economy (Economic Survey, 2016-17, Chapter 1); and trade tensions that could lead to skirmishes, and then spiral out of control. But perhaps the main risks lie on the macro-finance front in advanced economies. These stem from three, inter-related, sources:

- Asset valuations (price-equity ratios) tend to revert to their mean. And the faster and higher they climb, especially so late in the economic cycle, the greater the risk of sharp corrections.
- Simultaneously high valuations of both bonds and equities tend to be briefly lived because they suffer from an acute tension: if future earnings and economic growth are so bright, justifying high equity prices, interest rates cannot be forever so low.
- And if interest rates rise—or if markets even sense that central banks will need to shift their stance—both bond and equity prices could correct sharply. A plausible scenario would be the following. The IMF is now forecasting that advanced country output gaps will close in 2018 for the first time since the Global Financial Crisis. As this occurs, wages would start rising, eating into profits (which would

prick equity valuations); and as inflation rises in tandem, policy makers would be forced into raising rates, deflating bond valuations and further undermining share prices.

What would happen to growth if asset prices correct? Surely, the impact would be far smaller than it was in 2007-09, because advanced countries are far less vulnerable than they were a decade ago. In particular, the leverage tied to these assets is much lower, which would minimize contagious propagation; while banks are much better buffered, with higher levels of capital and core deposits, and lower levels of risky assets.

Even so, there would be some consequences. For one, a large decline in wealth would force advanced country consumers to cut back on their spending, which in turn would lead firms to curtail their investments. And if this happens, monetary and fiscal policies would have much less room for expansionary manoeuvre since interest rates are already low while government debts are high. And the political implications of yet another decline in asset prices, the second in a decade, could also be significant, with effects that are difficult to imagine.

In sum, assessing future risks hinges on two calls: interest rate policy and asset valuations. On policy, extraordinarily low rates have, to paraphrase Paul Krugman, become “an obsession in search of a justification.” Initially justified by the dislocations caused by the Global Financial Crisis, then by large output gaps, they are now defended on the grounds that inflation remains weak, even as the slack in product and labour markets is disappearing rapidly. Will the gathering new evidence on closing output gaps and rising employment dispel that obsession?

On valuations, the prognosticator must navigate a narrow strait: steering clear of the “Cry of Wolf” trap (bond prices will finally, finally correct, having defied the prediction of correction in each of the last several years), without succumbing to the siren call of “This Time is Different” (stock valuations are sustainable this time because interest rates will remain at historic lows).

## OVERVIEW OF INDIA’S ECONOMIC PERFORMANCE IN 2017-18

### Economic activity

The key question going forward is whether the economy has troughed, and if so at what pace it will recover toward its medium term trend. High frequency indicators do suggest that a robust recovery is taking hold as reflected in a variety of indicators, including overall GVA, manufacturing GVA, the IIP, gross capital formation (Figure 17) and exports.

Similarly, real non-food credit growth has rebounded to 4 percent in November 2017 on a year-on-year basis, while the squeeze on real credit to industry is abating (Figure 18). Moreover, the flow of nonbank resources to the corporate sector, such as bond market borrowing and lending by NBFCs, has increased by 43 percent (April-December 2017 compared to the same period a year ago), substituting in part for weak bank credit. Rural demand, proxied by motor cycle sales, and auto sales, while not yet back to its pre-demonetization trend, are recovering (Figures 19 and 20).

Perhaps most significantly, the behaviour of manufacturing exports and imports in the second and third quarters of this fiscal year has started to reverse. The re-acceleration of export growth to 13.6 percent in the third quarter of FY2018 and deceleration of import growth to 13.1 percent, in line with global trends, suggest that the demonetization and GST effects are receding. Services export and private remittances are also rebounding (Figure 21).

On demonetization specifically, the cash-to-GDP ratio has stabilized, suggesting a return to equilibrium. The evidence is that since about June 2017 the trend in currency is identical to that pre-demonetization (Figure 22). The stabilization also permits estimation of the impact of demonetization: about Rs. 2.8 lakh Crores less cash (1.8 percent of GDP) and about Rs. 3.8 lakh Crores less high denomination notes (2.5 percent of GDP).

A final, important factor explaining the growth recovery is fiscal, which is providing a boost to aggregate demand. For reasons related to smoothening the transition, GST revenues will only be collected for 11 months, which is akin to a tax cut for consumers. Meanwhile, overall revenue expenditure growth by the central and state governments at remains strong at 11.7 percent (April to November). Cyclical conditions may also lead to lower tax and non-tax revenues, which act as an automatic stabilizer.

All this said, while the direction of the indicators is positive, their level remains below potential. IIP growth (April-November 2017 over same period in the previous year) is 3.2 percent, real credit growth to industry is still in negative territory, and the growth in world trade remains less than half its level of a decade ago. Moreover, even though the cost of equity has fallen to low levels, corporates have not raised commensurate amounts of capital, suggesting that their investment plans remain modest (Box 6). In other words, the twin engines that propelled the economy's take-off in the mid-2000s – exports and investment – are continuing to run below take-off speed.

Meanwhile, developments in the agriculture sector bear monitoring. The trend acceleration in rural wages (agriculture and non-agriculture), which had occurred through much of 2016 because of increased activity on the back of a strong monsoon, seems to have decelerated beginning just before the kharif season of 2017-18 (Figure 23) but it is still greater than much of the last three years. Three crop-specific developments are evident. Sowing has been lower in both kharif and Rabi, reducing the demand for labour. The acreage for kharif and Rabi for 2017-18 is estimated to have declined by 6.1 percent and 0.5 percent, respectively. Pulses and oilseeds have seen an increase in sowing, but this has translated into unusually low farm gate prices (below their minimum support price, MSP), again affecting farm revenues. The so-called TOP perishables (tomatoes, onions, and potatoes) have meanwhile fluctuated between high and low prices, engendering income uncertainty for farmers.

The CSO has forecast real GDP growth for 2017-18 at 6.5 percent. However, this estimate has not fully factored in the latest developments in the third quarter, especially the greater-than-CSO-forecast exports

and government contributions to demand. Accordingly, real GDP growth for 2017-18 as a whole is expected to be close to 6 3/4 percent. Given real GDP growth of 6 percent in the first half, this implies that growth in the second half would rebound to 7.5 percent, aided by favourable base effects, especially in the fourth quarter.

Average CPI inflation for the first nine months has averaged 3.2 percent and is projected to reach 3.7 percent for the year as a whole. This implies average CPI inflation in the last quarter of 5 percent, in line with the RBI's forecast. Therefore, the GDP deflator is expected to grow by 3.6 percent for 2017-18, somewhat higher than the CSO's forecast of 2.8 percent. Consequentially, nominal GDP growth is estimated at 10.5 percent, compared with the CSO's 9.5 percent estimate.

### **Macroeconomic indicators**

After 13 months of continuously under-shooting the inflation target by an average of 130 basis points, headline inflation for the first time crossed the RBI's 4 percent target in November, posting a rate of 5.2 percent in December 2017 (Figure 24). The recent upswing in inflation stems from rising global oil prices (not all of which has been passed on to consumers), unseasonal increases in the prices of fruits and vegetables, and the 7th Pay Commission housing rent allowances, which mechanically increase inflation. Stripped of all these factors, underlying inflation has been increasing at a more modest pace, reaching 4.3 percent at end-December—in part because firms are passing the incidence of GST on to final consumers only gradually.

The current account deficit has also widened in 2017-18 and is expected to average about 1.5-2 percent of GDP for the year as a whole. The current account deficit can be split into a manufacturing trade deficit, an oil and gold deficit, a services deficit, and a remittances deficit (Figure 25). In the first half of 2017-18, the oil and gold balance has improved (smaller deficit of \$47 billion) but this has been offset by a higher trade deficit (\$18 billion) and a reduced services surplus (\$37 billion), the latter two reflecting a deterioration in the economy's competitiveness.

Despite these developments, the overall external position remains solid. The current account deficit is well below the 3 percent of GDP threshold beyond which vulnerability emerges. Meanwhile, foreign exchange reserves have reached a record level of about \$432 billion (spot and forward) at end-December 2017, well above prudent norms.

### **Fiscal developments**

Bond yields have increased sharply (Figure 26) since August 2017, reflecting a variety of factors, including concerns that the fiscal deficit might be greater-than-budgeted, expectations of higher inflation, a rebound in activity that would narrow the output gap, and expectations of rate increases in the US. As a result, the yield curve has become unusually steep (Figure 27).

The fiscal deficit for the first eight months of 2017-18 reached 112 percent of the total for the year, far above the 89 percent norm (average of last 5 years), largely because of a shortfall in non-tax revenue, reflecting reduced dividends from government agencies and enterprises. Expenditure also progressed at

a fast pace, reflecting the advancing of the budget cycle by a month which gave considerable leeway to the spending agencies to plan in advance and start implementation early in the financial year. Partially offsetting these trends will be disinvestment receipts which are likely to exceed budget targets.

GST revenue collections are surprisingly robust given that these are early days of such a disruptive change (See Box 7). Government measures to curb black money and encourage tax formalization, including demonetization and the GST, have increased personal income tax collections substantially (excluding the securities transactions tax). From about 2 percent of GDP between 2013-14 and 2015-16, they are likely to rise to 2.3 percent of GDP in 2017-18, a historic high. Precise estimates of the government's contribution to this improvement vary depending on the methodology used. An econometric exercise yields an estimate of Rs. 40,000 Crores over the two fiscal years of 2016-17 and 2017-18.3 Another based on comparing the difference in actual tax buoyancy in 2016-17 and 2017-18 over the previous seven-years' average buoyancy, yields an estimate of about Rs. 65,000 Crores (both exclude the 25,000 Crores collected under the Income Disclosure Scheme and Pradhan Mantri Garib Kalyan Yojana). Thus, the sum of all government efforts increased income tax collections, thus far, between Rs. 65,000 and Rs. 90,000 Crores. These numbers imply a substantial increase in reported incomes (and hence in formalization) of about 1.5 percent to 2.3 percent of GDP.

As a result of the budget overruns, the central government's fiscal deficit until November 2017 was Rs. 6.1 lakh crore compared to the budgeted Rs. 5.5 lakh crore. In contrast, state governments seem to be hewing closely to their targeted fiscal consolidation – in part because the centre has guaranteed them a large increase in their indirect tax take, as part of the GST agreement.

Reflecting largely fiscal developments at the centre, a pause in general government fiscal consolidation relative to 2016-17 cannot be ruled out. In addition, the measured deficit for 2017-18 will include Rs. 80,000 crore (0.5 percent of GDP) in capital provided to public sector banks. But this will not affect aggregate demand, as reflected in international accounting practice which deems such operations as financing ("below-the-line") rather than expenditure.

In the case of borrowing by the states, markets have perhaps inadequately taken into account the fact that higher market borrowings by them does not reflect higher deficits; rather about Rs. 50,000 crore or 0.3 percent of GDP of market borrowings is due to changes in the composition of financing, away from higher cost NSSF borrowings toward lower cost market borrowings. This lack of strict correspondence between the deficit and borrowings at the central and state levels (Figure 28) is discussed in greater detail in Box 8. For general government, about Rs. 40,000 Crores represents greater market borrowings that is not due to deficits—a fact which markets apparently have not internalized.

Another factor contributing to the rise in bond yields has been stepped-up Open Market Operations (OMO) by the RBI. This amounted to a net sale of about Rs. 90,000 Crores during April-December 2017-18 (compared to a net redemption of Rs. 1.1 lakh Crores during the same period in 2016-17) to sterilize the impact of foreign flows, themselves induced by high interest rates.

## OUTLOOK FOR 2018-19

The outlook for 2018-19 will be determined by economic policy in the run-up to the next national election. If macro-economic stability is kept under control, the ongoing reforms are stabilized, and the world economy remains buoyant as today, growth could start recovering towards its medium term economic potential of at least 8 percent.

Consider the components of demand that will influence the growth outlook. The acceleration of global growth should in principle provide a solid boost to export demand. Certainly, it has done so in the past, particularly in the mid-2000s when the booming global economy allowed India to increase its exports by more than 26 percent per annum. This time, the export response to world growth has been in line with the long-term average, but below the response in the mid-2000s. Perhaps it is only a matter of time until exports start to grow at a healthy rate. Remittances are already perking up, and may revive further due to higher oil prices.

Private investment seems poised to rebound, as many of the factors exerting a drag on growth over the past year finally ease off. Translating this potential into an actual investment rebound will depend on the resolution and recapitalization process. If this process moves ahead expeditiously, stressed firms will be put in the hands of stronger ownership, allowing them to resume spending. But if resolution is delayed, so too will the return of the private capex cycle. And if this occurs public investment will not be able to step into the breach, since it will be constrained by the need to maintain a modicum of fiscal consolidation to head off market anxieties.

Consumption demand, meanwhile, will encounter different tugs. On the positive side, it will be helped by the likely reduction in real interest rates in 2018-19 compared to the 2017-18 average. At the same time, average oil prices are forecast by the IMF to be about 12 percent higher in 2018-19, which will crimp real incomes and spending—assuming the increase is passed on into higher prices, rather than absorbed by the budget through excise tax reductions or by the oil marketing companies. And if higher oil prices requires tighter monetary policy to meet the inflation target, real interest rates could exert a drag on consumption.

Putting all these factors together, a pick-up in growth to between 7 and 7.5 percent in 2018-19 can be forecasted, re-instating India as the world's fastest growing major economy. This forecast is subject to upside potential and downside risks. The biggest source of upside potential will be exports. If the relationship between India's exports and world growth returns to that in the boom phase, and if world growth in 2018 is as projected by the IMF, then that could add another ½ percentage point to growth.

Another key determinant of growth will be the implementation of the IBC process. Here timeliness in resolution and acceptance of the IBC solutions must be a priority to kick-start private investment. The greater the delays in the early cases, the greater the risk that uncertainty will soon shroud the entire IBC process. It is also possible that expeditious resolution may require the government to provide more resources to PSBs, especially if the haircuts required are greater than previously expected, the ongoing process of asset quality recognition uncovers more stressed assets, and if new accounting standards are implemented.

Persistently high oil prices (at current levels) remain a key risk. They would affect inflation, the current account, the fiscal position and growth, and force macroeconomic policies to be tighter than otherwise. One eventuality to guard against is a classic emerging market “sudden stall” induced by sharp corrections to elevated stock prices. (Box 9 suggests that India's stock price surge is different from that in other countries but does not warrant sanguine-ness about its sustainability.) Savers, already smarting from reduced opportunities in the wake of demonetization, from depressed gold prices, and from lower nominal interest rates, would feel aggrieved, leading to calls for action. Stock price corrections could also trigger capital outflows, especially if monetary policy unwinds less hesitantly in advanced countries and if oil prices remain high. Policy might then have to respond with higher interest rates, which could choke off the nascent recovery. The classic emerging market dilemma of reconciling the trade-off between macro-stability and growth could then play itself out.

A key policy question will be the fiscal path for the coming year. Given the imperative of establishing credibility after this year, given the improved outlook for growth (and hence narrowing of the output

gap), and given the resurgence of price pressures, fiscal policy should ideally have targeted a reasonable fiscal consolidation. However, setting overly ambitious targets for consolidation—especially in a pre-election year—based on optimistic forecasts that carry a high risk of not being realized will not garner credibility either. Pragmatically steering between these extremes would suggest the following: a modest consolidation that credibly signals a return to the path of gradual but steady fiscal deficit reductions.

Against this overall economic and political background, economic management will be challenging in the coming year. If the obvious pitfalls (such as fiscal expansion) are avoided and the looming risks are averted that would be no mean achievement.

## **SERVICE INDUSTRY: INDIAN OVERVIEW**

### **Introduction**

The services sector is not only the dominant sector in India's GDP, but has also attracted significant foreign investment flows, contributed significantly to exports as well as provided large-scale employment. India's services sector covers a wide variety of activities such as trade, hotel and restaurants, transport, storage and communication, financing, insurance, real estate, business services, community, social and personal services, and services associated with construction.

### **Market Size**

The services sector is the key driver of India's economic growth. The sector contributed around 53.8 per cent of its Gross Value Added in 2016-17 and employed 28.6 per cent of the total population. Net services exports from India grew 14.6 per cent in the first half of 2017-18 and the sector attracted 60.7 per cent of India's total FDI inflows.

India's score in the Nikkei/IHS Market Services Purchasing Managers Index grew from 45.90 in July 2017 to 50.90 in December 2017, supported by growth in the growth in Information & Communications and Finance & Insurance. As per the Economic Survey 2017-18, Central Statistics Office's (CSO) first advance estimates of Gross Value Added (GVA) in FY 2017-18 indicate that the services sector is expected to grow 8.3 per cent year-on-year.

According to a report called 'The India Opportunity' by leading research firm Market Research Store, the Indian mobile services market is expected to reach \$37 billion in 2017 and grow by 10.3 per cent year-on-year to reach US\$ 103.9 billion by 2020. Out of overall services sector, the sub-sector comprising financial services, real estate and professional services contributed US\$ 305.8 billion or 20.5 per cent to the GDP. The sub-sector of community, social and personal services contributed US\$ 188.2 billion or 12.6 per cent to the GDP.

### **Investments**

The Indian services sector which includes financial, banking, insurance, non-financial/business, outsourcing, research and development, courier and technical test analysis, has attracted FDI equity inflows in the period April 2000-September 2017, amounting to about US\$ 62.39 billion which is about 17.46 per cent of the total foreign inflows, according to the Department of Industrial Policy and Promotion (DIPP).

Some of the developments and major investments by companies in the services sector in the recent past are as follows:

- Private Equity (PE) investments in the hospitality industry rose nearly three-fold to US\$ 119 million in 2017 from US\$ 43.58 million in 2016. Hotel deals, including mergers and acquisitions, are expected to pick up further in 2018 as many premium hotel properties are up for sale.
- American fast food chain McDonalds is reopening 84 of its closed restaurants, increasing the total number of operational restaurants across north and east India to 169.

- National Skill Development Corporation has signed a tripartite Memorandum of Understanding (MoU) with Tourism and Hospitality Sector Skill Council (THSC) and Airbnb to impart hospitality skills training to hospitality micro-entrepreneurs in India.
- The domestic and foreign logistic companies are optimistic about prospects in the logistics sector in India, and are actively making investments plans to improve earnings and streamline operations.

### **Government Initiatives**

The Government of India recognises the importance of promoting growth in services sectors and provides several incentives in wide variety of sectors such as health care, tourism, education, engineering, communications, transportation, information technology, banking, finance, management, among others. Prime Minister Narendra Modi has stated that India's priority will be to work towards trade facilitation agreement (TFA) for services, which is expected to help in the smooth movement of professionals. The Government of India has adopted a few initiatives in the recent past. Some of these are as follows:

- Under the Mid-Term Review of Foreign Trade Policy (2015-20), the Central Government increased incentives provided under Services Exports from India Scheme (SEIS) by two per cent.
- Ministry of Communications, Government of India, has launched DARPAN - “Digital Advancement of Rural Post Office for A New India” which is aimed at improving the quality of services, adding value to services and achieving “financial inclusion” of un-banked rural population.
- Software services exports from India grew 10.3 per cent year-on-year to US\$ 97.1 billion in 2016-17. The USA and Canada remained the top destinations of India's export of software services and were followed by Europe.
- Ministry of Civil Aviation, Government of India, launched 'DigiYatra', a digital platform for air travellers that aims to develop a digital ecosystem providing consistent service and a delightful experience at every touch point of the journey.
- The Ministry of Electronics and Information Technology has launched a services portal, which aims to provide seamless access to government services related to education, health, electricity, water and local services, justice and law, pensions and benefits, through a single window.

### **Road Ahead**

Services sector growth is governed by both domestic and global factors. The Indian facilities management market is expected to grow at 17 per cent CAGR between 2015 and 2020 and surpass the US\$19 billion mark supported by booming real estate, retail, and hospitality sectors. The performance of trade, hotels and restaurants, and transport, storage and communication sectors are expected to improve in FY17. The financing, insurance, real estate, and business services sectors are also expected to continue their good run in FY17.

The implementation of the Goods and Services Tax (GST) has created a common national market and reduced the overall tax burden on goods. It is expected to reduce costs in the long run on account of availability of GST input credit, which will result in the reduction in prices of services.

## **LOGISTICS SERVICE INDUSTRY: GLOBAL OVERVIEW**

Logistics is an integral activity for economic growth as it involves the management of flow of goods from place of origination to place of consumption. The sector comprises shipping, port-services, warehousing, rail, road and air freight, express cargo and other value added services. The global logistics market currently generates over USD 8 trillion annually and represents around 11% of global

GDP. The growth of the logistics sector is linked to growth in international trade flows and the robustness of the economic environment.

Trade was severely affected during the financial crisis of 2008-2009. Since then, global trade had been recovering and has returned back to 2009 levels in recent years, i.e. around 60% of global GDP.

The following key trends are being observed in the logistics sector across the globe:

### **1. Digitization and Automation**

Digitization in the logistics sector is currently in a nascent stage with most processes yet to be automated. The current structure of the logistics sector involves intermediaries, which lead to leakages in the value chain and hence, higher costs for consumers. Technology is being applied and implemented in different formats; physical automation for trucking and warehousing; automated documentation and booking of parcels, online marketplaces for comparing price and services, etc. All these technological enhancements have provided benefits in the form of disintermediation of services, cost rationalization and curbing inefficiencies.

### **2. Shifting of Trade Centres**

Demographic profiles of Asian populations coupled with economic growth has triggered demand-led consumption. In Africa, critical positioning and access to natural resources is incentivizing investments in the region. Population density and ever-increasing aspirational requirements are leading large scale producers to migrate to these regions to build infrastructure and production facilities. Accordingly, trade movement has been increasing towards these regions to meet the growing demand and investments.

### **3. E-Commerce Wave**

The growth of e-commerce has given way to specific logistics channels handling only last mile deliveries. These channels ensure faster delivery and provide assured reverse logistics. They also insure for the consignee collection of payment. This model is a true 3PL (third-party logistics) service offering. With the complexity involved and the level of automation required, big e-commerce companies like Amazon and others have set up their own last mile delivery services and are now entering as full-fledged 4PL logistics service providers.

## **LOGISTICS SERVICE INDUSTRY: INDIAN OVERVIEW**

India's logistical costs as a percentage of GDP is on the higher side: 13.0% vs. global average of 11.7%. Logistics in India are plagued by an inefficient system, lagging infrastructure, lower average trucking speeds, congestion and bottlenecks in surface transportation, etc. In terms of the relative composition of transportation and logistics costs, transportation costs in the US and China are high due to widespread geography. Interestingly, costs are also high in India but due to a combination of factors including vehicle quality, stressed drivers, overloading, poor road infrastructure, and low average speeds. In addition, costs are higher due to excessive taxes and toll expenditures.

The size of the logistics sector in India is estimated to be USD 260 billion. Unlike global trends, the logistics sector in India has been growing at a healthy rate of ~14% over the last 5 years on strong demand drivers. Over the last two decades, the Indian logistics sector has evolved from mere transportation services to fully integrated service providers. Going forward, the trend towards integration of logistics service providers is expected to continue and new players/business models are expected to emerge amid the digitization and automation of business processes, implementation of the new GST (goods and services tax), and expansion in the 3PL/4PL service landscape.

### **Evolution of Logistics Sector in India**

#### **Before 1990s**

- Limited to outsourcing of transportation activities for movement of goods through warehouses
- Mainly annual contracts
- Due to complex excise tax and other duties the focus was on cargo movement for reducing inventory and distribution costs through physical distribution management

### **1990s to 2000**

- With port modernization, discharge & loading operations at port became efficient
- Custom clearance, freight forwarding, and inventory management became more structured, restricted operations in periphery of port
- Focus on integration of business functions to manage supply chain, mostly multimodal including open yard management

### **2000 to 2014**

- Growth in trade volumes & regulations has led to emergence of CFS/ICD operations
- Third-party logistics service providers needed to handle movement of cargo across the logistics value chain
- Higher outsourcing and more value added services came into play like in-plant management, reverse logistics etc.
- Focus on integrating supply chain, service providers to meet customers distribution needs

### **After 2014**

- Digitization of logistics services to increase transparency resulting in disintermediation of services.
- Market demanded total integration of logistics services and outsourcing to 3PL/4PL service providers

## **KEY DRIVERS & TRENDS: LOGISTICS SERVICES INDUSTRY**

The logistics sector in India is expected to grow at a healthy rate of close to 12%-14% going forward. The growth is expected along with a transition of the sector from high cost to a leaner cost alternative through rationalization of expenses, elimination of intermediaries and technology adaptation. This is possible with significant development and improvement envisaged in infrastructure, adaptation of technology and backed by a changing regulatory environment. Key drivers and trends which are expected to contribute towards the growth of the sector are:

- **Implementation of Goods and Service Tax:**

The Indian parliament cleared the long pending implementation of the Goods and Service Tax (GST) which will simplify the tax structure and improve the turnaround time for trucks, hence easing cargo movement. The GST is expected to be implemented across the country from 1st July 2017. As discussed earlier, the current tax structure leads to inefficiencies and delays in cargo movement. The GST is expected to trigger a significant change in the warehousing sector with the small state-wise warehouses being consolidated in large nodal based multi-product.

- **Integrated Supply Chain Service Provider**

The logistics sector stands to benefit from the increasing trend of outsourcing. Logistics functions are traditionally performed by the organizations themselves. However, corporate entities recognize the benefits associated in engaging third-party logistics providers for integration of information flow, material handling, production, packaging, inventory, transportation, warehousing and often security. This allows corporate entities to concentrate on their core business and also achieve cost rationalization through outsourcing. Higher outsourcing of services have further benefited from:

**Shift from 80-20 to 65-35:** Traditionally, logistics as a service constitute 80% of cost in the form of transportation (mainly fuel) and 20% in the form of storing and peripheral services. However, over the last 4-5 years with the drop in fuel prices, the logistics cost had eased considerably. This enabled value added service providers to raise their share of services and include services like packaging, in plant inventory management, etc. The cost shift is now gradually moving from traditional 80-20 to 65-35, with additional benefits in the form of service integration.

**Unorganized Sector & Asset Lean Business Model:** Traditionally, logistics providers have been working on an asset-heavy business model. With the help of technology, some companies have migrated to the asset-lean model of providing integrated logistics solution with an optimum mix owned and outsourced assets. The unorganized nature of the transportation sector, which is largely fragmented, benefited the integrated supply chain service provider to justify need of outsourcing partners.

- **Infrastructure Development:**

**Road Development:** Over the last two years, the Government of India has increased its pace of road construction. Further, the policy has been strengthened with the Government mandating that no road project will be awarded until 80% of land is acquired, which increases the viability of the project and reduces delays in implementation after award of the project. The Government has set a target of constructing 15,000 km of roads in FY 2017-18 with budgetary allocation of close to USD 14 billion for the year. The stage is set to develop a more robust road infrastructure network across the country.

**Dedicated Freight Corridors/DMIC:** The Government approved the construction of dedicated freight corridors in 2014/15 to increase freight handling capacity through railways and reduce transit time. Currently, the plan is to connect the high container traffic routes of North to West and North to East through dedicated freight corridors. Completion of these projects will not only increase the freight handling capacity on these routes but will also increase the average travelling speed of freight wagons from the current 25kms/hour to 70 kms/hour. The vast expanse of India would be interlinked to enable seamless cargo movement from areas of production to areas of consumption. Going forward, the Government is further committed to developing three additional freight corridors i.e. (1) East-West Corridor (Kolkata Mumbai, 2328 kms) (2) North-South Corridor (Delhi-Chennai, 2,343 kms) and (3) East Coast Corridor (Kharagpur- Vijayawada, 1,114 kms). Completion of these corridors will improve the logistics efficiency and reduce costs and transit time.

**Inland Waterways Development:** India has about 14,500 kms of navigable waterways which include rivers, canals, backwaters, creeks, etc. Currently, only 4,382 kms of waterways have been utilized. There is a huge potential waiting to be unlocked through development of these inland waterways. In 2016, the Government announced 106 new national waterways through enactment of the National Waterways Act. This will help realize the potential of inland waterways as greener and more cost effective options and establish routes in which adjoining hinterlands could be serviced. According to government estimates, inland waterways transport has potential investment opportunities of around USD 600 million in the next 3-4 years, towards various ongoing/proposed programs.

- **“TECHNOGISTIC Powered” – Technology Reshaping Existing Delivery Systems**

Cloud based systems are replacing legacy enterprise resource planning (ERP) systems in manufacturing and logistics organizations. Software-as-a-Service (SaaS) companies have penetrated the technology users with much affordable terms providing lean investments and easy upgrades. These providers offer increased versatility and inbuilt flexibility to adapt to changes and market developments.

Robotics is being utilized at warehouses for tagging, labelling, sorting, and placing products in carts and shelves. The role of robotics has enabled round-the-clock operations. This has helped to rationalize the costs of evacuation during low peak hours of traffic.

Similarly, Industrial Internet of Things (IIoT), Internet of Things (IoT) and Big Data Analytics are streamlining supply chain functions of organizations for just-in-time inventory and provide predictive analysis to manage procurement processes. Technology is enabling logistics firms to eliminate inefficiencies to boost operations.

- **Contingency Preparedness:**

Logistics solutions are being designed to cater to meet the requirements of emergency contingencies, especially natural and manmade disasters. With dynamic geo-political situations and climatic

changes, the world is prone to face challenges and disasters more often. Logistics service providers are getting more attuned to providing services to meet emergency needs.

- **E-Commerce and Emerging Logistics:**

Channels: E-commerce is currently a USD 16 billion market but growing rapidly and expected to reach USD 100 billion by 2020. Advent of e-commerce has led to creation of multisource channels for vendors, even small sized ones.

In traditional brick and mortar channels distribution is much simpler with products arriving at warehouses in bulk, moved around in pallets and selected by the case, and shipped out to store in bulk. E-commerce businesses pose a unique challenge to the traditional logistics channel. In ecommerce, inventory arrives in bulk but needs to be distributed into different SKUs. The distribution to onward channels is much more diverse and in smaller parcels. The complexity of this process increases with thousands of suppliers, multiple warehouses and extensive sales channel across geographies, increasing the risk of misplaced orders. In addition to that, logistics channel companies are also expected to process the payment through delivery and manage the complicated reverse logistics in case of return of product. Managing all these activities requires technology and standardization to synchronize business processes with real-time access and insight to inventory management.

With intense competition in the e-commerce segment and emphasis on prompt and fast delivery of products, the distribution channel has been put under immense pressure in all major modes of freight movement. "Just in Time" and "Just in Case" strategies in logistics must now meet to the challenge of "Just Do It" demand created by today's highly impatient customers. To meet this growing demand of e-commerce logistics, new channels and companies have emerged with different business models and catering exclusively to e-commerce companies like DelhiVery, Ecom Express, DotZot, eKart etc. These companies have attracted significant PE capital as growth trajectory forecasted to rise on the back of growing market size.

- **Green Transition:**

Reverse logistics has become an integral part of e-commerce transactions. Similarly, a sustainable solution for manufacturing companies and production plants is envisaged in the form of 'Green Earth' initiatives for recycling and disposal of residual plant wastages. In developed countries, manufacturing units follow stringent norms with regards to recycling and disposal of residual plant waste. However, in India, residual raw material and waste like sludge is often disposed in open yards. Meeting green standards would require finding logistical solutions for disposal and treatment through creation of cluster infrastructure for further processing, recycling and finding alternative use of the residual plant waste.

## **CHALLENGES FACED BY LOGISTICS INDUSTRY:**

The main issues currently faced by the logistics sector in India are as follows:

- **Connectivity Congestion:**

India is ranked 35th in the Logistics Performance Index (LPI) by the World Bank which benchmarks efficiency of trade logistics across nations. India's low ranking is due to slow transit time for the movement of cargo through road and shipping networks. In terms of transportation through shipping channels, transit time is affected due to lengthy custom clearance processes and the number of intermediaries required for bringing products in/out of the country. The road logistics network is affected due to poor infrastructure as national highways constitute only 2% of the overall road network. In addition, toll collection, inter-state checkpoints and other stoppages lead to higher transit times.

- **Lower Standardization:**

India's logistics market has been impacted by lower standardization of cargos and containerization of logistics traffic, hampering the overall speed and thus increasing cost of movement.

- **Tax Structure and Regulatory Inefficiencies:**

India is currently in the midst of a transition from a historical state-wise tax regime to a centralized Goods and Service Tax. At present, India has different applicable tax rates within 29 states and multiple taxes levied are by both Central and State governments when goods move across the state borders. This leads to higher cost and inefficiency/delays on account of inadequate documentation and necessary clearances while goods are transiting across multiple state borders. The planned dual GST model (central GST and state GST) proposes to replace around 29 state and federal taxes with a single tax regime at the point of sale.

- **Unfavourable Modal Mix:**

Cargo movement in India is skewed towards road networks. India boasts the world's fourth largest railway network and is cheaper than roads, but suffers from under investment resulting in capacity constraints, redundant railway siding, inadequate rolling stocks, and non-availability of cargo hubs in proximity to industrial hubs with a large work-force. Inland waterways, despite being green and cost effective, are affected due to inadequate transit gateways between inland waterways and linkages to coastal shipping. Air is the fastest transportation mode but continues to have miniscule (1%) share in the transportation pie and suffers from limited connectivity and an absence of designated cargo terminals. The inability to provide last mile connection leads industries to prefer the road as mean of transportation of goods.

#### **International Commercial Terms (“Incoterms”)**

Incoterms are standard trade definitions most commonly used in international sales contracts. Devised and published by the International Chamber of Commerce (“ICC”), they are at the heart of world trade. ICC introduced the first version of Incoterms in 1936. Most contracts made after January 01, 2000 will refer to the latest edition of Incoterms, which came into force on that date. The correct reference is “Incoterms 2000”. Unless the parties decide otherwise, earlier versions of Incoterms - like Incoterms 1990 - are still binding if incorporated in contracts that are unfulfilled and are dated before January 01, 2000. The latest version of Incoterms is designed to bring Incoterms in line with the latest developments in commercial practice. Correct use of Incoterms goes a long way to providing the legal certainty upon which mutual confidence between business partners must be based. Among the best-known Incoterms are EXW (Ex works), FOB (Free on Board), CIF (Cost, Insurance and Freight), DDU (Delivered Duty Unpaid), and CPT (Carriage Paid To).

#### **4.2.2. FIELD 4 & 5: BID OPTIONS REVISION 'FROM' AND 'TO'**

- (a) Apart from mentioning the revised number of shares in the Revision Form, the Bidder must also mention the details of shares applied/bid for given in his or her Bid cum Application Form or earlier Revision Form. For example, if a Bidder has Bid for three options in the Bid cum Application Form and such Bidder is changing only one of the options in the Revision Form, the Bidder must still fill the details of the other two options that are not being revised, in the Revision Form. The members of the Syndicate, the Registered Brokers and the Designated Branches of the SCSBs may not accept incomplete or inaccurate Revision Form.
- (b) In case of revision, Bid options should be provided by Bidders in the same order as provided in the Bid cum Application Form.
- (c) In case of revision of Bids by RIIs, Employees and Retail Individual Shareholders, such Bidders should ensure that the Bid Amount, subsequent to revision, does not exceed Rs. 200,000. In case the Bid Amount exceeds Rs. 200,000 due to revision of the Bid or for any other reason, the Bid may be considered, subject to eligibility, for allocation under the Non-Institutional Category, not being eligible for Discount (if applicable) and such Bid may be rejected if it is at the Cut-off Price. The Cut-off Price option is given only to the RIIs, Employees and Retail Individual Shareholders indicating their agreement to Bid for and purchase the Equity Shares at the Issue Price as determined at the end of the Book Building Process.
- (d) In case the total amount (i.e., original Bid Amount plus additional payment) exceeds Rs. 200,000, the Bid will be considered for allocation under the Non-Institutional Category in terms of the RHP. If, however, the RII does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of allocation, such that no additional payment would be required from the RII and the RII is deemed to have approved such revised Bid at Cut-off Price.
- (e) In case of a downward revision in the Price Band, RIIs and Bids by Employees under the Reservation Portion, who have bid at the Cut-off Price could either revise their Bid or the excess amount paid at the time of Bidding may be unblocked in case of Bidders.

#### **4.2.3. PAYMENT DETAILS**

- a) All Bidders are required to make payment of the full Bid Amount (less Discount, if applicable) along with the Bid Revision Form. In case of Bidders specifying more than one Bid Option in the Bid cum Application Form, the total Bid Amount may be calculated for the highest of three options at net price, i.e. Bid price less discount offered, if any.
- b) Bidder may Issue instructions to block the revised amount based on cap of the revised Price Band (adjusted for the Discount (if applicable) in the ASBA Account, to the same Designated Intermediary through whom such Bidder had placed the original Bid to enable the relevant SCSB to block the additional Bid Amount, if any.
- c) In case the total amount (i.e., original Bid Amount less discount (if applicable) plus additional payment) exceeds Rs. 200,000, the Bid may be considered for allocation under the Non-Institutional Category in terms of the DRHP. If, however, the Bidder does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for may be adjusted

downwards for the purpose of Allotment, such that additional amount is required blocked and the Bidder is deemed to have approved such revised Bid at the Cut-off Price.

Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP. For details in relation to allocation, the Bidder may refer to the RHP.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders may refer to the RHP.
- d) **Illustration of the Book Building and Price Discovery Process**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs.20 to Rs 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

  - Each successful Bidder shall be allotted [●] equity shares; and

- If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Bidders in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Bidder in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Bidder applying for the minimum number of Shares. ## **RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES**

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (**"FEMA"**). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (**"RBI"**) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (**"DIPP"**).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (**"FDI"**) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (**"DIPP"**), has issued consolidated FDI Policy Circular of 2017(**"FDI Policy 2017"**), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India (**"RBI"**) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time.
